Papaya is a healthy fruit with a list of properties that is long and exhaustive. You can munch on it as a salad, have it cooked or boiled or just drink it up as milkshake or juices. Papaya has many virtues that can contribute to our good health. The most important of these virtues is the protein-digesting enzyme it has. Papain in raw papaya makes up for the deficiency of gastric juice and fights excess of unhealthy mucus in the stomach and intestinal irritation. The ripe fruit, if eaten regularly corrects habitual constipation, bleeding piles and chronic diarrhea. The juice of the papaya seeds also assists in the above-mentioned ailments. Papaya juice, used as a cosmetic, removes freckles or brown spots due to exposure to sunlight and makes the skin smooth and delicate. A paste of papaya seeds is applied in skin diseases like those caused by ringworm.
